MOSTAFA ALI ZAKARIA

Flutter Software Engineer | Android · iOS · Web

Cairo, Egypt | mostafa@studyzone.app

LinkedIn | GitHub | Available now for full-time remote or Cairo roles

PROFILE

Flutter engineer behind StudyZone, a published Android, iOS and web platform serving 359,000+ registered users (~165k MAU). Expert in building responsive Arabic RTL/LTR interfaces, video learning, real-time messaging, and subscription monetization using Dart and Cubit/BLoC. Also built ShirtZone (shirtzone.app), an AI apparel platform with a custom design studio and virtual try-on, with hands-on ownership of Go APIs and releases.

EXPERIENCE

StudyZone | Software Engineer and Founder Aug 2024 - Present

studyzone.app | App Store | Google Play

- Published Flutter apps on Android, iOS and web serving 359,000+ registered users (~165k MAU); structured 174+ screens and 46+ feature modules with Cubit/BLoC, Clean Architecture and offline persistence.
- Built responsive Arabic RTL interfaces, video learning player, interactive quizzes, and real-time chat (rooms up to 114k+ members); resolved recovery states and client performance bottlenecks.
- Implemented client payment and subscription flows with server-validated pricing, receipt verification, and resilient offline/online synchronization across webhooks.
- Integrated client AI experiences: AI study kits, smart flashcards, automated summaries, and pgvector semantic search with streaming responses.
- Led a founding team of three for six months, then owned engineering across student apps, admin dashboards, and production Play Store and App Store releases (1,020+ merged PRs).
- Built internal operations tooling including Flutter Web admin (admin.studyzone.app) and teacher dashboards; integrated Firebase (FCM, Crashlytics) and Cloudflare R2 media storage.

ADDITIONAL PRODUCT

ShirtZone | AI-Powered Custom Apparel Platform & Commerce Studio

shirtzone.app

- Architected and built an AI-powered custom apparel platform featuring "Stitch", an interactive studio that generates production-ready garment artwork from prompts with canvas editing and placement controls.
- Delivered the end-to-end commerce experience in Flutter (compiled to WebAssembly via skwasm and mobile) and Go: dynamic quote engine, multi-item cart, cash on delivery (COD) & card checkout, shipping, and virtual try-on, verified by 5,700+ automated tests.

TECHNICAL SKILLS

Mobile and web: Flutter, Dart, Cubit/BLoC, Clean Architecture, responsive RTL/LTR UI, WebAssembly (skwasm), Firebase, FCM

Backend and data: Go, Fiber, PostgreSQL, Redis, REST APIs, WebSockets, SQL optimization, C#/.NET

AI and delivery: Multi-provider LLMs (Gemini, OpenRouter), embeddings, pgvector, evaluations, Docker, Railway, GitHub Actions

EDUCATION

Bachelor’s Degree in Computer Science | New Cairo Academy, Egypt

Algorithmic problem solving: 1,000+ Codeforces problems solved.
