

# MOSTAFA ALI ZAKARIA

Flutter Software Engineer | Android • iOS • Web

Cairo, Egypt | [mostafa@studyzone.app](mailto:mostafa@studyzone.app)

[LinkedIn](#) | [GitHub](#) | Available now for full-time remote or Cairo roles

## PROFILE

Flutter engineer behind StudyZone, a published Android, iOS and web platform with 209,000+ registered users. Build Arabic-first interfaces, video learning, subscriptions and real-time experiences using Dart and Cubit/BLoC. Also building ShirtZone, an AI-powered clothing design and e-commerce platform, with hands-on ownership of Go APIs and releases.

## EXPERIENCE

**StudyZone | Software Engineer and Founder** Aug 2024 - Present

[studyzone.app](#) | [App Store](#) | [Google Play](#)

- Published Flutter apps on Android, iOS and web with video learning, quizzes, subscriptions, chat and push notifications; structured features with Cubit/BLoC, Clean Architecture and offline persistence.
- Built responsive Arabic RTL interfaces and media playback flows; tested client behavior and resolved recovery-state and API-integration defects.
- Implemented payments and subscriptions with idempotent webhooks, provider-state reconciliation and server-side pricing to handle retries and inconsistent payment states.
- Shipped AI tutoring, summaries, flashcards and semantic search with pgvector; developed model evaluation fixtures, usage tracking and spending controls.
- Led a founding team of three for six months, then owned engineering across the student apps, backend, operational dashboards and production releases.
- Built admin and teacher dashboards and content-ingestion tools; managed Docker deployments on Railway, Firebase integration and Cloudflare R2 storage.

## ADDITIONAL PRODUCT

**ShirtZone | AI-Powered Clothing Design & E-Commerce Platform**

[shirtzone.web.app](#)

- Built an AI-powered design experience that turns user ideas into artwork for personalized T-shirts, with AI-assisted editing, a manual design editor and garment-placement controls.
- Connected the Flutter design experience to Go services for design quotes, cart and checkout; implemented responsive Arabic RTL interfaces and checkout recovery.

## TECHNICAL SKILLS

**Mobile and web:** Flutter, Dart, Cubit/BLoC, Clean Architecture, responsive UI, Firebase, FCM

**Backend and data:** Go, Fiber, PostgreSQL, Redis, REST APIs, WebSockets, SQL optimization, C#/.NET

**AI and delivery:** LLM integration, embeddings, pgvector, evaluations, Docker, Railway, GitHub Actions

## EDUCATION

Bachelor's Degree in Computer Science | New Cairo Academy, Egypt

Algorithmic problem solving: 1,000+ Codeforces problems solved.
